

Entrepreneurship Cell Project ABHIKALPANA

Team E-Cell has been the flagbearer when it comes to creating opportunities from problems. We live in a country where we have abundance of workforce but still we face the problem of unemployment. If the youth of the nation could be properly trained, many of them can form a part of the skilled workforce.

After studying and carefully examining this problem, a student team of 30 members kick started project ABHIKALPANA. The objective of the project was to turn the underprivileged into skilled manpower by training and educating them about the manufacturing process of certain handicrafts like diaries, bookmarks, paper bags, etc. The project was the center of attraction during Yuva Spandana-19 and was also much appreciated at other competitions.
