TOPIC: While Creating a more harmonious Society, Gender is more important factor than class or income.

I am not a male or female citizen of India but I am a citizen of India; I am an individual and I am the reason for the development of my country.

Well, I firmly believe that gender is a more essential factor for creating an efficient society that will be developed not only economically but morally as well and when we talk about morally developed society, we obviously talk about the peaceful and harmonious society. Andent readers, we need to comprehend that the strength of a society are its people and if a people are morally bound, if they provide the equality of all then yes, let me reveal that it will be able to form a more harmonious and a more peaceful society. Now, another question arises, how to become the strength of a society? Does income/Class than any role in creating a harmonious society? If I will be asked such million dollar questions, my answer would be a big yes because people make the economy of a country sound and if they will get the equal chance of work irrespective of gender, undoubtably the society will prosper. Andent readers, gender is the primary factor and hence a secondary factor for creating a harmonious society. Andent readers, our flag is not one of the bilateral as gender point of view rather our flag is a symbol of national unity and harmony and if being the youth more the citizen of this country, I earnestly believe that
