The Conference will feature discussions and presentations organized into several sessions covering a range of tracks as detailed in the attached brochure, as well as a prominent keynote address and various plenary sessions.

CONFERENCE OBJECTIVES

The objectives of the conference on “Sustainability, Technology, and Education: Driving Innovations for Viksit Bharat@2047” is to address the intersection of sustainability, technological advancement, and education as key drivers in shaping India's future by the year 2047.

Broadly, the intent is to explore the innovative strategies for achieving sustainable development goals (SDGs) in India, focusing on how these align with India's vision for 2047, through:

- exploring ways to balance economic growth, environmental stewardship, and social equity;
- leveraging technology for growth;
- transforming education systems by integration of digital tools, e-learning, and innovation-driven teaching methodologies into India's education system;
- fostering innovation;
- encouraging entrepreneurship in green technologies, renewable energy, and tech-driven solutions to address pressing environmental challenges; and vision for Viksit Bharat (Developed India);
- fostering discussions on how India can become a global leader in sustainable technology and innovation.

Overall, the conference would aim to promote a holistic approach where sustainability, technological innovation, and education work in harmony to create a prosperous and sustainable India by 2047.
