Visit to Yamuna Biodiversity Park

In Collaboration with

Department of Environment, Government of India

Field Trip to Yamuna Biodiversity Park by Eco club volunteers of Shyam Lal College on 3rd March 2018 total 15 students went to the park. The main motive of the trip was to create awareness among students about different facets of biodiversity and to develop the positive attitude towards the environment. The parks are budding as a major centre for enriching people's lives through environmental education and awareness, especially for schools and colleges of Delhi. The visit began with introductory remarks about biodiversity conservation and the efforts being made by the Park authorities. This was followed by a visit to the Nature Interpretation Centre (NIC) which has been curated near the entry point to the Park. The NIC provided the students with basic understanding of the various stages through which the Park has undergone, from being a barren piece of land and a fruit orchard. This was followed by visit to wetlands sites. The students were also shown several species of herbs and trees that were once found aplenty in Delhi's urban ecosystem, but now have become considerably reduced in number in the city so in order to generate awareness on various environmental aspects, its conservation and sustainable usage of natural resources through action-based programs is need of the hour and to propagate the eco-friendly attitude among the youth.
