Sanitization Drive in Ghitora Village

As the COVID-19 pandemic spreads across the globe, millions of people are heeding the advice of health experts to wash their hands. A simple tool to promote public health, handwashing is one of the most effective ways to prevent transmission of disease—not just the coronavirus (e.g. COVID-19), but also diarrhea, cholera, and typhoid.

But for 3 billion people around the world who do not have a handwashing facility with water and soap at home, this small action to prevent infection remains out of reach.

On 10th September 2021, Shyam Lal College under Unnat Bharat Abhiyan took the initiative to sanitize the **Ghitora** village amid rising Covid- 19 Cases. About 5 Volunteers and other staff members took the sanitizers, disinfectants with them to sanitize each and every street and house of the villages. They also sought help from the native villagers to assist them in sanitizing. The UBA team also spread awareness among villagers about the benefits of sanitization. The UBA team also made aware villagers how to take precautionary measures in these Covid times. Pamphlets prepared in lucid language, along with graphical presentation, were distributed among the villagers. Pamphlets educating about vaccine registration process were also distributed and people were encouraged to follow it.

The Sarpanch expressed his gratitude to team UBA and Shyam Lal College for sanitizing the whole village and educating them about the need of sanitisation amid covid times.
