

Eco-club (the_last_leaf) Shyam Lal College
Report on Climatic Conclave
In collaboration with
Department of Environment, Government of India

SLC Eco-club students participated at a youth climate conclave which was launched by a delegation of the European Union (EU) in India. The conclave had a series of events including photography contest and a blog contest competition on 4th October 2019. Students also got an opportunity to interact and share fresh ideas with a renowned person Mr. Rajinder Singh (Water man of India). This interaction was very fruitful to further channelize the thinking process of students and their commitment towards the environment. Our students took part in various events like photography, Blogging and short video contests. Around 30 students participated in this conclave. This conclave was envisioned as competitive and educational also. The motive of the event was joining hands with the youth across the country and addressing the issues of climate change.
