

**Eco-club (the\_last\_leaf) Shyam Lal College**  
**Report on Best out of waste**  
In collaboration with  
**Department of environment, Government of India**

The motion “BEST OUT OF WASTE” in itself refers to encourage reuse of wastes. In our homes, there are many clothes which lie unworn. Based on the thinking to reuse these clothes and reuse the waste products our team collaborated with Swachhta Action Plan and decided to make cloth bags which would rather help to replace plastic bags, used in homes and to increase the awareness about the environment among the people. Eco-club play an important role in creating environmental awareness amongst the students and these are the means by which students can be empowered to participate and take up meaningful environmental activities and projects. Preparation of Eco- friendly product out of waste material forms an important part of Eco-club as it enables us to make the useless things more useful. So our Eco-club team not only make various things like cloth bags, wall hangings, face mask, wall decorations, flower pots, paper bags etc. and also create awareness among students through Whatsaap, Facebook etc. to use the waste products in best possible way from 5<sup>th</sup>Jan 2021 to 25<sup>th</sup>Feb 2021 around 20 students participated in this awareness program.
