

Eco-club (the_last_leaf) Shyam Lal College
In collaboration with
Department of Environment, Government of NCT, Delhi

Eco-club students took the initiative to collectively dispose of e-waste in their homes. They ensured that e-waste was properly disposed of avoiding regular trash. They also tried to reuse certain waste to make productive items in their places, like paper and bottles. Our team of 10 students found inspiration and embarked on a month-long drive (from January 1st to January 31st, 2023) dedicated to recycling, reusing, and repairing old electronics at home. Motivated by their cause, they started collecting old devices to raise awareness in their homes as well. Small steps like reducing and reusing can help conserve our natural resources. Our volunteers extended a helping hand to their parents, engaging in one of the noblest tasks in the conservation of our planet.
