

Eco-club (the_last_leaf) Shyam Lal College
In collaboration with
Department of Environment, Government of NCT, Delhi

This report highlights the significance and outcomes of a one-week e-waste collection drive that started on 5th -10th June 2023, aimed at promoting the responsible disposal of electronic waste. The drive aimed to raise awareness about the environmental and health risks associated with improper e-waste disposal and encouraged individuals and organizations to participate in recycling efforts. Our 15 volunteers hosted a collection drive for e-waste on our college campus. They engaged with students and faculty members to raise awareness about e-waste and its proper processing. The volunteers set up a stall to collect e-waste and educated students about different types of e-waste and the recycling process.
