BHASKAR- 8287442145

The session centered around the theme "Formula of Success in Students Life," wherein both speakers shared invaluable insights on enhancing student life, managing challenges, and integrating learnings from various sources such as literature, including "The Mahabharata" and "Ramayana," personal experiences, and mentorship.

Their discourse emphasized the importance of embracing positivity and continuous learning from diverse sources, be it from mentors, peers, or even nature. They underscored the role of teachers in shaping students' outlook positively and motivating them to seek knowledge and inspiration from their surroundings.

The speakers shared anecdotes from their own journeys, including recitations of their poetry, which captivated the audience. A spirited question-and-answer session followed, wherein students engaged with the speakers on topics ranging from their professional experiences to the significance of civil service positions like IPS and IAS.

Essential life lessons were imparted, aimed at guiding students on their path to success and instilling in them a resilient mindset. The interactive nature of the session fostered a vibrant exchange of ideas, leaving attendees both enlightened and inspired.

Approximately 150 students participated in the session, departing with newfound motivation and a deeper understanding of navigating the journey to success. The event concluded on a positive note, resonating with a Shloka from the Bhagwat Geeta, encapsulating the essence of the enlightening discourse. Special acknowledgement to Dr. Kanika Solanki for making this event successful.

Convenor:

Dr. Reeta Sharma
