

Unnat Bharat Abhiyan Report
on
Celebration of Republic Day with Gram Sabha

The Unnat Bharat Abhiyan (UBA) team of SLC(University of Delhi) Shyam Lal College visited Ghitora, Dist-Baghpat, Kotwalpur and Chirodi, Dist-Ghaziabad as part of its outreach programme on the Republic Day. Noteworthy to mention that SLC has adopted five villages in Baghpat and Ghaziabad districts of Uttar Pradesh respectively.

The UBA team began the outreach programme from the Chirodi village. The villagers along with the Gram Pradhan warmly received the team and brought them to the local community health centre. The team interacted with many patients and made them aware about the rapidly growing life style based diseases, pollution originated problems and water-borne diseases. The teams made them understand the significance of physical exercises and yoga too. Afterwards the team visited a girl's school and joined the students in the Republic day participation. The team members also interacted with young students and counselled them on upcoming board exams. They would also continue to mentor them in terms of their future career plans.

In the next part of the visit the UBA team reached Ghitora village. The Gram Pradhan and villagers displayed the excitement to have the UBA team members. The UBA team along with the Gram Pradhan visited the local primary school where the celebration of the republic day was on full swing. The UBA team members narrated some inspiring stories of the national heroes to the young students and tried to arouse the feelings of love and affection into young minds. The team members offered the all possible help to the villagers in the holistic development of the village.

Lastly the UBA team paid a visit to Kotwalpur village. The team members met numerous villagers and tried to understand their concerns and issues regarding various government issues. The team assured the villagers for all possible help. The team highlighted the importance of digital literacy since many government schemes could be availed through the use of internet. On the demand of villagers the UBA team would begin a digital literacy programme in the village. The programme would be the comprehensive in nature and cover the students' related problems as well as the villagers' problems.

SLC's UBA team is planning to organize a well-structured programme to carry out the above tasks, most probably, in the month of February, 2024.
